(SGD) ERIC P. PALACPAC
Chairperson, Bids and Awards Committee

A food-secure Philippines
with prosperous farmers and fisherfolk

Technical Specifications

Item	Specification	Statement of Compliance
		<p><i>[Bidders must state here either "Comply" or "Not Comply" against each of the individual parameters of each Specification stating the corresponding performance parameter of the equipment offered. Statements of "Comply" or "Not Comply" must be supported by evidence in a Bidders Bid and cross-referenced to that evidence. Evidence shall be in the form of manufacturer's un-amended sales literature, unconditional statements of specification and compliance issued by the manufacturer, samples, independent test data etc., as appropriate. A statement that is not supported by evidence or is subsequently found to be contradicted by the evidence presented will render the Bid under evaluation liable for rejection. A statement either in the Bidder's statement of compliance or the supporting evidence that is found to be false either during Bid evaluation, post-qualification or the execution of the Contract may be regarded as fraudulent and render the Bidder or supplier liable for prosecution subject to the applicable laws and issuances.]</i></p>

Item	Specifications	Statement of Compliance (Comply or Not Comply)
1	BREED: Crossbred Female Buffaloes	
2	Quantity and Place of Delivery: 60 heads – Within Panay Island	
3	Heifer/Cow 1. Age: at least 18 months old 2. Weight: at least 280 kgs 3. BCS: not less than 3.0 4. Animal ID: The animal should be identified thru proper eartags.	
4	Description A crossbred buffalo produced from mating riverine bull to a swamp buffalo cow may also be used for dairying. Increasing the riverine blood in the crossbred population is desirable and results to higher milk production. This is done by repeated backcrossing to riverine bull.	
5	Traits and characteristics: 1. Horn are curved in a semi-circle pointing backwards and inwards. 2. Black body and coat, though brown coat color may sometimes be observed. An occasional faint chevron mark in the neck (but not as distinct as swamp type), may be acceptable. 3. The characteristics white stocking hair color pattern in the fetlock area seen in swamp type is not present or not distinct with crossbred animals. 4. Average mature body weight is 650 kg for males and 550 kg for female
